Dear colleagues,

I would like to send you a reminder about the selection process that is open for the EUDONORGAN Train the Trainers program.

EUDONORGAN is a unique opportunity where health care professionals involved directly in organ donation but also hospital managers, journalists, communication officers from the ministry of health, patient group representatives can be involved. The organ donation activity in your country depends on all of them so please do not hesitate to take this chance and reward them with this program.

Apart from the fact that all costs will be covered by the project (which is quite exceptional), they will be provided with a wonderful tool by the end of the program (that we are currently developing for training and awareness campaigns).

Looking forward to hearing from you.

Many thanks,
